Team Charter

TO: Professor Haughn

FROM: Cale Augustine, Aathithya, Aiden Kyle, Chase Wheat, Neal Sharma

DATE: October 18, 2026

SUBJECT: Team Charter for Usability Study Project

Primary Goal or Objective (3-5 sentences)

The primary goal is to conduct a usability study to analyze the ergonomics and usefulness of a specific website or app. Additionally, the team hopes to foster a collaborative environment throughout the project to make the experience more productive and enjoyable. To do this, the group will follow the requirements and guidelines listed under the assignment and abide by this team charter.

Each Person Role (3-5 sentences about each role)

Cale Augustine: They will be responsible for conducting 1 interviewer. They will also make sure that we are staying on schedule and getting all the assignments done on time. They will help with writing the rough draft of the report and making sure that all the data says organized throughout.

Chase Wheat: Will be responsible for selecting one person to interview and performing that interview. Will also help with organizing report data and formatting it alongside any other formatting and editing on the final document. Will contribute to all major assignments including but not limited to the final paper, and the plan and protocol.

Neal Sharma: Will be responsible for conducting 1 of the 5 interviews and helping organize the data collected. Will also help write the final report and review the results from the interviews. Will contribute to other parts of the project as needed to make sure everything gets done on time.

Aiden Kyle: They will conduct 1 of the 5 interviews. They will help generate questions for interviews. They will also help with research and with creating the slideshow / presenting the slideshow. They will contribute to the final paper. They are suited for these responsibilities because similar tasks have been completed in prior classes.

Aathithya: will be doing the interview, helping collect data, and working with the team to find the website and other useful resources that could help our group. Will also be testing the app to see if it's a good pick. Will also be taking care of the document format.

Personal Goals and Commitment

Each member hopes to improve their teamwork, communication, research, and writing skills. Everyone agrees to contribute fairly, complete their assigned work on time, and help other members when needed.

Communications

We have made a Group chat via RCS/MMS (Texting) and will do all communications through that. We will keep track of the URLs to the sources used for future access.

Outside Meetings

In person or online meetings will be agreed upon if and when needed.

AI usage

No AI will be used unless discussed with the lecturer.

Strategies to deal with disagreements

1. To hear out everyone's thoughts and discuss with the team for the best possible outcome.
2. We can involve the professor if we cannot come to an agreement ourselves.

How to deal when contribution is poor-quality or subpar?

1. Have a talk with the person to try to make sure their work gets better.
2. If an agreement can't be reached and subpar behavior continues, alert Professor Haughn
3. If a deadline is missed, a new deadline will be created to get the group back on track.

Other Factors

- Outside commitments (other classes, jobs, extracurricular involvement, etc can increase people's workload)
- Procrastination tendencies (should be minimized within reason to avoid missed deadlines)
- Illness (May lower productivity and someone may have to do extra work if another member is sick)

Week by week schedule

Oct 19 – 23

- Choose a website or app to analyze
- Develop a user profile

- Decide evaluation criteria and performance metrics

Oct 26 – 30

- Write introduction questions
- Chose 5 actions that the users perform
- Write post test questions
- Decide who/when interviews will be conducted
- Finish plan and protocol

Nov 1 – Plan and protocol

Nov 2 – 6

- Start conduct the interviews
- Do any additional research that we need

Nov 9 – 13

- Finish conducting the interviews
- Write findings, context, and limitations

Nov 16 – 20

- Make slideshow
- Finish the Briefing

Nov 22 – Results Briefing

Nov 30 – Dec 4

- Make sure that all our data is organized and collected
- write the paper and get a good rough draft finished

Dec 7 – 11

- Working on editing and revising
- Finish all the details
- Turn in the paper

Dec 13 – Final Report Submission
